Security

● Agent loop

- LangGraph ReAct agent, max 20 steps per task
- Single frozen model (deepseek-v4-flash) for all roles
- Patch scored by the eval_v3 harness

● Retrieval held constant

- Pure cosine similarity, fixed top-k = 5
- Identical across all six conditions
- Same embedder (nomic-embed-text-v2-moe, 768-d) for query + write

● The only variable

- The forgetting policy is the sole swappable component
- 1 of 6 policies acts at the maintain step
- Everything else is shared infrastructure
